Nonna, what's the best way to cut the avocado since it has the seed in the middle?

S: Slice the avocado until the knife meets the seed and rotate the avocado with the knife in place until you have sliced all the way around the avocado. Twist and pull the avocado apart. When you've done that let me know.

U: Done.

S: Grab a clean folded towel and place it in your hand. Put the half with the seed in the towel with the seed side up. Grab a sharp knife and very carefully strike the seed with the knife. The knife should stick to the seed and all you have to do is rotate the knife to loosen and remove the seed. If you need additional help I've provided a video tutorial on your mobile device. If you are ready to continue please say continue.

U: Continue
